## CANDYCOAT ENHANCER

SIO2 CERAMIC COATING REJUVENATOR SPRAY

SKU

30-00622

16 OZ

SIO2

30-01139

32 OZ

SiO2 ceramic-based liquid spray coating. Used on top of CandyCoat ceramic nano coatings to extend coating life, or as a stand-alone high-gloss spray on paint, glass, and plastic.

### PERFORMANCE

|             |                                                                                                               |
|-------------|---------------------------------------------------------------------------------------------------------------|
| ROLE        | SiO2 ceramic-based liquid spray coating / coating rejuvenator                                                 |
| FINISH      | Extreme high-gloss shine (2024 catalog)                                                                       |
| DURABILITY  | Adds 6 months of paint protection (2024 catalog)                                                              |
| MAINTENANCE | Apply CC Enhancer once every 3–4 months or as needed to restore hydrophobicity and shine (Elite product page) |
| SURFACES    | Paint, glass, and plastic · over CandyCoat ceramic nano coatings or stand-alone                               |
| PROPERTIES  | Enhances hydrophobic and anti-static properties of CandyCoat coatings (2024 catalog)                          |

### APPLICATION

|            |                                                         |
|------------|---------------------------------------------------------|
| DILUTION   | Not published — sold as a spray coating                 |
| USE WITH   | CandyCoat ceramic nano coatings (topper) or stand-alone |
| INTERVAL   | Every 3–4 months or as needed (Elite product page)      |
| PROTECTION | 6 months (2024 catalog)                                 |

### OVERVIEW

CandyCoat Enhancer is a specially formulated SiO2 ceramic-based liquid spray coating. The 2024 manufacturer catalog: it can be used on top of CandyCoat ceramic nano coatings to extend coating life and enhance hydrophobic and anti-static properties, or as a stand-alone product to give paint, glass, and plastic an extreme high-gloss shine with 6 months of paint protection. CandyCoat Elite aftercare: apply CC Enhancer once every 3–4 months or as needed to restore hydrophobicity and shine. A dedicated Enhancer product page is not currently listed on carcandy.com.

### DIRECTIONS

- 1 Use on top of CandyCoat ceramic nano coatings to extend coating life and restore hydrophobic / anti-static properties (2024 catalog).
- 2 May also be used as a stand-alone spray coating on paint, glass, and plastic (2024 catalog).
- 3 Reapply once every 3–4 months or as needed to restore hydrophobicity and shine (Elite product page).
- 4 Step-by-step spray/wipe method is not published on the current manufacturer product pages or 2024 catalog.
