OVERVIEW

Lake Country urethane DA backing plates are premium molded, high-strength plates sized for random orbital polishers. Catalog lists 5/16"x24 thread across 148mm, 125mm, and 73mm diameters for matching foam and wool DA pads.

DIRECTIONS

- 1 Thread the backing plate onto the polisher spindle to the correct thread size; verify secure fit before use.
- 2 Center the hook-and-loop polishing pad on the plate; pad must be at least the plate diameter.
- 3 Operate within the polisher's rated speed; inspect hooks and urethane for wear or damage before each job.
- 4 Do not use a damaged plate; replace if hooks are worn or the urethane is cracked.
