# REACTIVATION SHAMPOO

## DESCALING SOAP FOR CERAMIC COATINGS

SKU

**806001US**

**DEFAULT TITLE**

Strong foaming, acidic shampoo to reactivate ceramic seals. Hydrophilic dirt such as dust, limescale and salts are removed by washing with the Reactivation Shampoo.

### PERFORMANCE

|                  |                                                |
|------------------|------------------------------------------------|
| ROLE             | Vehicle cleansing                              |
| SURFACES / AREAS | Lacquer, glass and plastic in the outdoor area |
| PH               | 1 (PI)                                         |
| APPEARANCE       | Colourless · Characteristic (SDS)              |
| DENSITY          | 1.03 g/cm3 (SDS)                               |

### APPLICATION & PHYSICAL

|               |                                                                                                                                                                  |
|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| METHOD        | Coarse dirt should be removed with an alkaline pre-cleaner and high-pressure wash before using Reactivation Shampoo.                                             |
| VOC           | ~ 5,37 % (SDS)                                                                                                                                                   |
| TRANSPORT     | Not regulated for transport (SDS §14)                                                                                                                            |
| WARNINGS (PI) | Do not let the product dry. Check for material compatibility before use. Protect from frost and excessive heat. Wearing gloves is recommended during application |
| MDSC SIZES    | Default Title (806001US)                                                                                                                                         |

### OVERVIEW

Strong foaming, acidic shampoo to reactivate ceramic seals. Hydrophilic dirt such as dust, limescale and salts are removed by washing with the Reactivation Shampoo. Such dirt impairs the easy-to-clean effect and the hydrophobic effect of the ceramic-sealed surfaces. The acidic setting of the shampoo ensures that the dirt is loosened and removed. This revives the dirt and water-repellent properties of the ceramic coating. SDS signal word: Danger.

### DIRECTIONS

- 1 Coarse dirt should be removed with an alkaline pre-cleaner and high-pressure wash before using Reactivation Shampoo.
- 2 Dilute the shampoo 1:200 (for hand washing 50 ml to 10 l) with water.
- 3 This achieves a pH of 3.0.
- 4 When using a foam cannon, adjust the pre-dilution accordingly.
- 5 Wash the pre-cleaned and still wet vehicle with a washing sponge.
- 6 Rinse the product thoroughly to avoid stains. Dry off residual water. PI warnings: Do not let the product dry. Check for material compatibility before use. Protect from frost and excessive heat. Wearing gloves is recommended during application

### SAFETY SNAPSHOT

#### DANGER

Eye Dam. 1 · Aquatic Chronic 3 · Skin Corr. 1 · H412-Harmful to aquatic life with long lasting effects. H290-May be corrosive to metals...
