OVERVIEW

Mirka Abralon® is a foam-backed silicon carbide abrasive for smooth and profiled surfaces. Patented flexible construction reduces pressure marks and supports wet or dry finishing before polishing.

DIRECTIONS

- 1 Mount the disc centered on a compatible Mirka grip backing pad / interface.
- 2 For profiled surfaces and fine finishing, Mirka recommends wet use where appropriate.
- 3 Sand with even pressure; foam distributes load on edges and curves.
- 4 Progress grit sequence as needed, then polish per compound system (e.g. Polarshine®).
