OVERVIEW

Lake Country HDO® pads use dual-layer construction to unleash long-throw orbital polishers — capturing tapered-pad anti-roll and backing-plate protection while transferring more machine action to the working face with less foam fatigue.

DIRECTIONS

- 1 Prime the pad with a thin, even layer of compound or polish across the face (CCS pockets help guide priming when present).
- 2 Attach the pad centered on a compatible hook-and-loop backing plate; pad diameter must meet or exceed the plate.
- 3 Work at manufacturer-recommended polisher speeds for the cut stage; keep the pad flat — do not tip the edge into the finish.
- 4 Clean residue regularly (System 4000® / Snappy Clean Boost™ per Lake Country pad-care instructions); air dry.
