### OVERVIEW

Safety Flanges are to be used during high speed polishing and buffing with our Airway Buffing Wheels . They are meant to reduce the chances warping of the center plate of the buffing wheel. In addition to offering protection against warping, Safety Flanges also help to keep the buffing wheel securely in place. Attach the safety flanges to each side of your airway buffing wheel by simply placing the flange on your gri

### DIRECTIONS

1. Inspect tool/kit components before use; verify arbor, thread, and RPM compatibility with your grinder/polisher.
2. Mount securely with proper flanges/lock nuts as applicable; follow tool OEM RPM limits.
3. Use appropriate PPE (eye/face, hearing, gloves) for metal polishing operations.
4. After use, clean compound load from wheels (rake) and store dry.

### SAFETY SNAPSHOT

#### ARTICLE/TOOL — SDS TYPICALLY N/A; MECHANICAL AND DUST HAZARDS DURING POLISHING

Follow polisher OEM and compound SDS when used with chemical compounds.

**FORM** Article / manufactured tool (not a chemical substance)

**SDS** Not typically issued for articles; see companion compound SDS when polishing

Manufacturer SDS not retrieved for this article (towels/tools are articles — SDS often N/A) or see Renegade Products downloads / local archive.
