OVERVIEW

Autofiber Saver Applicator adds a hydrophobic barrier between microfiber and sponge so low-viscosity coatings waste less product into the foam core (mfr). MDSC title says Suede; Autofiber SKU SX001GYG321-12 is listed as Mini Saver Terry — manufacturer-first (mfr).

DIRECTIONS

1. Apply coating/sealant sparingly to the microfiber face (barrier limits soak-through).
2. Spread in even overlapping passes; do not flood the sponge core.
3. Replace applicator when face loads or coating begins to tack on the pad.
