STARKE TEAK CLEAN

TWO-PART CLEANER & BRIGHTENER

SKU

TEAKCA128

PART A 128 OZ

ACID

TEAKCB128

PART B 128 OZ

TKC-AB

A+B KIT

Two-part teak cleaner and brightener: Part A (acid) opens and cleans grey teak; Part B (base) neutralizes on the wood to restore a natural golden brown. Gentle on caulk seams; tough on stains.

PERFORMANCE

SYSTEM	Two-part acid (A) + base (B)
ROLE	Clean & brighten grey, lusterless teak
PART A	Acid cleaner — dilute up to 4:1 or full strength
PART B	Base neutralizer — reaction must occur on the teak
RESULT	Natural golden brown teak
CAULK	Gentle on caulk seams

APPLICATION

PREP	Wet teak and surrounding area
PART A DWELL	2–3 minutes after surface turns blackish
TOOLS	Separate bucket & brush/pad for A and B
SIZES	Part A 128 oz · Part B 128 oz · A+B kit
CAUTION	Acid burns paint, stainless, metals if left to dry

OVERVIEW

Starke Teak Clean is a two-part cleaner and brightener for grey teak that has lost its luster. Part A (TEAKCA128) is an acid that can be diluted up to 4:1 or used full strength; Part B (TEAKCB128) is a base. They neutralize each other on contact — that reaction must happen on the teak, not in a shared bucket or brush. Used together they restore a natural golden brown. Sold as Part A, Part B, or both (TKC-AB).

DIRECTIONS

- 1 Wet the teak and surrounding area. Wear rubber gloves and eye protection.
- 2 Pour Part A into its own bucket (dilute up to 4:1 or full strength). Apply to wet wood with brush/scouring pad; scrub lightly in circles against the grain.
- 3 When the surface turns blackish, dwell 2–3 minutes. If caulk lines throw heavy black, hose off before Part B.
- 4 Use a separate bucket and brush for Part B. Rub Part B into the same teak so neutralization happens on the wood.
- 5 Rinse thoroughly. Keep acid off paint, stainless, and metals — rinse immediately if contacted and never let it dry on those surfaces.

SAFETY SNAPSHOT

CAUTION

Part A acid · Part B base — neutralize on wood only. PPE: rubber gloves & eye protection. SDS not published by Starke.

SYSTEM	Two-part liquid (A acid / B base)
PART A SIZE	128 oz (TEAKCA128)
PART B SIZE	128 oz (TEAKCB128)
KIT	TKC-AB (both)
