OVERVIEW

Ultra Clean is the Starke Clean System wash for ceramic-coated boats. pH-neutral and coating-safe, with SiO₂ chemistry that deposits a fresh silica layer each wash so protection is reinforced instead of stripped. Run it in a foam cannon or bucket at the same dilution as Pure Clean. Pair with monthly Replenish (Venom strip wash first) for the complete ceramic maintenance path that Starke targets at 12–18 months of coating performance. Add Simple Clean when a tough job needs more cut.

DIRECTIONS

- 1 Dilute in a foam cannon or wash bucket at the same rate you use for Pure Clean.
- 2 Wash top to bottom with a microfiber mitt in straight lines. Avoid brushes on smooth coated surfaces.
- 3 Rinse clean. Every wash deposits SiO₂ back into the ceramic coating.
- 4 For monthly coating care: Venom strip wash, then Replenish. Add Simple Clean to Ultra Clean only when extra cutting power is needed.
